## HARSH SH Skiploaders

For Truck Chassis, 26 Tonnes GVW / 44 Tonnes GTW

### Why choose HARSH Skiploaders?

HARSH skiploaders are firm favourites for their strength, durability and reliability. As such, they deliver outstanding performance and productivity.

For 26t six wheelers working in intensive industrial applications, operators can count on HARSH skiploaders to move heavier and bulkier loads with ease and efficiency. As such, they are now a first choice for arduous applications such as metals and glass recycling.

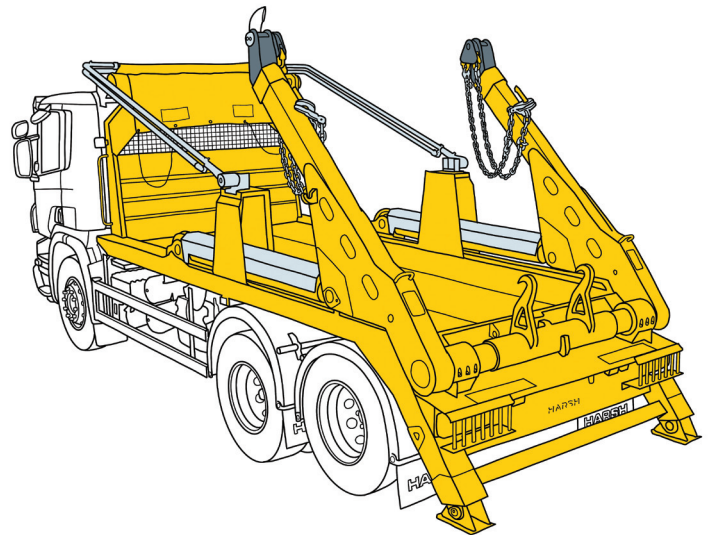

Equally important as vehicle performance, HARSH back-up and service support is genuinely second to none. All of which means that HARSH skiploaders deliver an unrivalled operating solution.
